

COVID-19

Instructions for outdoor and indoor areas

Restrictions on the size of gatherings depends on the decision of the authorities at any given time.

As of 5 October 2020, all indoor and outdoor areas may not accommodate more than 20 people unless the area can be divided into separate areas with no more than 20 people. Children born in 2005 and later are not included in this number.

There should be no contact (mixing) between areas. It goes against the purpose of the number limit to have areas divided with no more than 20 people in each but then to have many areas come together e.g. when entering or exiting.

In all areas, it is applicable that individuals should not enter the area if they:

- Are in quarantine.
- Are in isolation (also while waiting for screening results).
- Have been in isolation due to COVID-19 infection and 14 days have not passed since discharge.
- Have symptoms (cold, cough, fever, headache, bone or muscle aches, fatigue).

Individuals should respect the 1-metre distance limit between individuals who are not connected. Children born in 2005 and later are exempt.

Easy access to hand washing facilities and hand sanitiser must be provided.

Each defined area must be clearly defined. Each area must have its own entrance and exit, and no contact is allowed between the areas.

Toilets must be separate for each area, and two toilets are preferred for each area as well as hand washing facilities.

Ticket sales, sales of refreshments and other similar services need to be unique for each area. Employees providing these services may not move between area. The same goes for servers.

Common contact surfaces must be cleaned and disinfected at least daily or more often depending on the circumstances.

Guests should be urged to exercise extreme caution and respect the 1-metre physical distancing rule and infection prevention. Posters are available for display as reminders (<https://www.covid.is/veggspjold>).
