

COVID-19 personal protective equipment (PPE)

A brief visit, e.g., give medicine, food, fluids, turn in bed, fix a remote etc.

Resident has **MINOR symptoms**. No fever, slight cough and little phlegm:

Just a FFP2 (viral mask) is needed - wash hands or use alcohol rub before and after entering the area

A brief visit, e.g., give medicine, food, fluids, turn in bed, fix a remote etc.

Resident has **MAJOR symptoms**. Fever, weakness, cough and a lot of phlegm:

Just a FFP2 (viral mask) and goggles/ facial shield is needed - wear

gloves if you need to touch body fluids, wash/alcohol rub your hands before and after entry

Long visit, e.g. help with ADL, urine/faeces, bathing etc.

FULL PPE GEAR; viral mask, goggles/shield, gloves and gown -

wash/alcohol rub your hands before entry, after taking off gloves and after leaving the room

P.S. THERE IS NEVER THE NEED FOR DONNING 2 PAIR OF GLOVES AT THE SAME TIME – HAIRNET or hat is NOT NEEDED – NEVER USE BLUE PLASTIC SHOES OVER SHOES
